

PCE MEET

Learn together | Conversations that matter

INTRODUCTION

Launching in 2026, **Project Controls Expo (PCE)** will host a series of exclusive **PCE Meet** events across key global locations including **Australia, USA, UK, Dubai, Saudi Arabia and Singapore**. These events are designed to deliver high-impact learning experiences through focused bootcamps, followed by curated networking evenings that bring together senior professionals, practitioners, and industry stakeholders within the regional project controls community.

PCE Meet events complement the flagship Project Controls Expo by providing deeper technical engagement, practical knowledge transfer, and meaningful relationship-building in a smaller, high-quality setting.

EVENT FORMAT

Each PCE Meet event is structured as a two-part programme:

Technical Sessions (Daytime)

The technical sessions is an immersive, deep-dive educational session focused on a regionally relevant project controls topic. The emphasis is on bridging theory and practice, enabling delegates to immediately apply learning in real-world scenarios.

Key characteristics:

- ▶ In-depth exploration of a specific project controls topic
- ▶ Practical application through case studies, exercises, or group activities
- ▶ Interactive format encouraging discussion, problem-solving and peer learning
- ▶ Maximum of 20 delegates, ensuring quality delivery and engagement

Technical Sessions are delivered by Subject Matter Experts (SME) with strong industry credibility and practical experience.

Networking Event (Evening)

Following the technical sessions, a networking evening is organised to extend conversations and build connections in a relaxed environment.

Key characteristics:

- ▶ Open to technical sessions delegates and additional invited professionals
- ▶ Informal setting designed to encourage meaningful networking
- ▶ Typically includes drinks and/or a light activity, depending on the location

The Networking Events offer an informal opportunity for project controls professionals to connect and engage with peers in a relaxed setting.

AUDIENCE & DELIVERY

All PCE Meet events are **fully managed and delivered by the Project Controls Expo team**, ensuring a consistent, professional experience across all regions.

PCE Meet responsibilities include:

- ▶ Event planning and coordination
- ▶ Delegate registration and on-site management
- ▶ Marketing and promotions
- ▶ Liaison with speakers and sponsors
- ▶ Venue coordination, AV support, and printed materials

PCE Meet will work closely with speakers and sponsors to ensure alignment, smooth delivery, and maximum value for all parties.

AUDIENCE & QUALITY ASSURANCE

- ▶ Attendance is strictly capped at 20 delegates per bootcamp
- ▶ Audience typically includes project controls professionals, senior practitioners, consultants, owners, and delivery organisations
- ▶ Small group size ensures high interaction, depth of discussion, and learning quality

Summary

The Project Controls Expo Meet events offer a high-value, high-impact platform for speakers to share expertise and for sponsors to engage meaningfully with the global project controls community. By combining deep technical learning with focused networking, these events play a key role in advancing the profession across multiple international markets.

EXCLUSIVE EVENT SPONSORSHIP OPPORTUNITY

PCE Meet offers a high-value, curated sponsorship platform combining technical learning and premium networking with senior project controls professionals from diverse industry sectors.

Our events include:

- ▶ A focused daytime technical session/s
- ▶ An evening networking session with industry peers and decision-makers

To maximize partner value and brand impact, only ONE sponsor is appointed per event, ensuring full exclusivity and undiluted exposure. Sponsors can choose to support a Technical Workshop, an Evening Networking Session, or both.
