Project Controls Background

In recent years project controls have become established as a dedicated discipline with a rapidly growing community of senior professionals recognized for their value to all projects.

For a project to succeed, appropriate planning is vital and hence accurate estimating, cost and schedule management, risk management, change management and forecasting is now deemed essential. The development of a suitable project control system, and a team to execute these systems, is an integral part of the overall project management effort.

A report by PWC suggested that worldwide infrastructure spending will grow to \$9 trillion per year in 2025. With project controls investment estimated to average at least 2% of a project cost, this values the spend on project controls at around \$20 billion. Little wonder this is a sector that now has dedicated departments, staff and is establishing best practice techniques.

Project Controls Expo offers this rapidly expanding community the best route to examining all that is on offer by presenting a showcase of the leading products & services, combined with a multi stream dedicated cutting edge educational programme.

The Worlds largest project controls event

Networking | Education| Opportunities

Project Controls is all about sharing the right information (KPIs) to the right stakeholders at the right time to ensure the right decisions are taken at the right time.

Project Controls Expo is the venue to meet all involved: Client, End User, Contractor, Consultancy and Technology Suppliers.

“Project Controls
EXPO

is a celebration of
project controls”

Project Controls Expo AUS

Owes it success to the unique mix of

Project Controls Expo AUS owes it success to the unique mix of educational sessions, workshops, a partners showcase and dedicated networking events. It offers a distinctive forum for learning as well as the opportunity for the exchange of ideas across industries and the chance for delegates to examine the most up to date products and services as solutions to their pain points.

The education programme offers eight different streams of content with presentations led by users, clients, consultants and providers and hence gives a combination of all angles, experience and opinions.

The partners showcase hosts the leading technology suppliers and consultancies, offering a multitude of answers to the issues faced by project controls professionals including cost, risk analysis, scheduling and estimating.

The Asia-Pacific Awards Evening illustrates the Expo's continuous efforts to recognize the best projects and practices serving as a platform to hear and share the success stories within the project controls community.

To cap the whole Expo experience, there are many networking opportunities including the Asia-Pacific Awards Evening within the Stadium. This creates a true and unparalleled community feel across all two days of PCE AUS
