ECITB – leading industry learning

The Engineering Construction Industry Training Board (ECITB) works with employers, government, professional bodies and training providers to meet the current and future skills needs of the engineering construction industry.

Employer-led, we invest around £25 million each year to attract, develop and qualify the workforce in a wide range of craft, technical and professional disciplines. We also work with companies and providers to develop training standards, qualifications, training courses and apprentice standards to meet their needs.

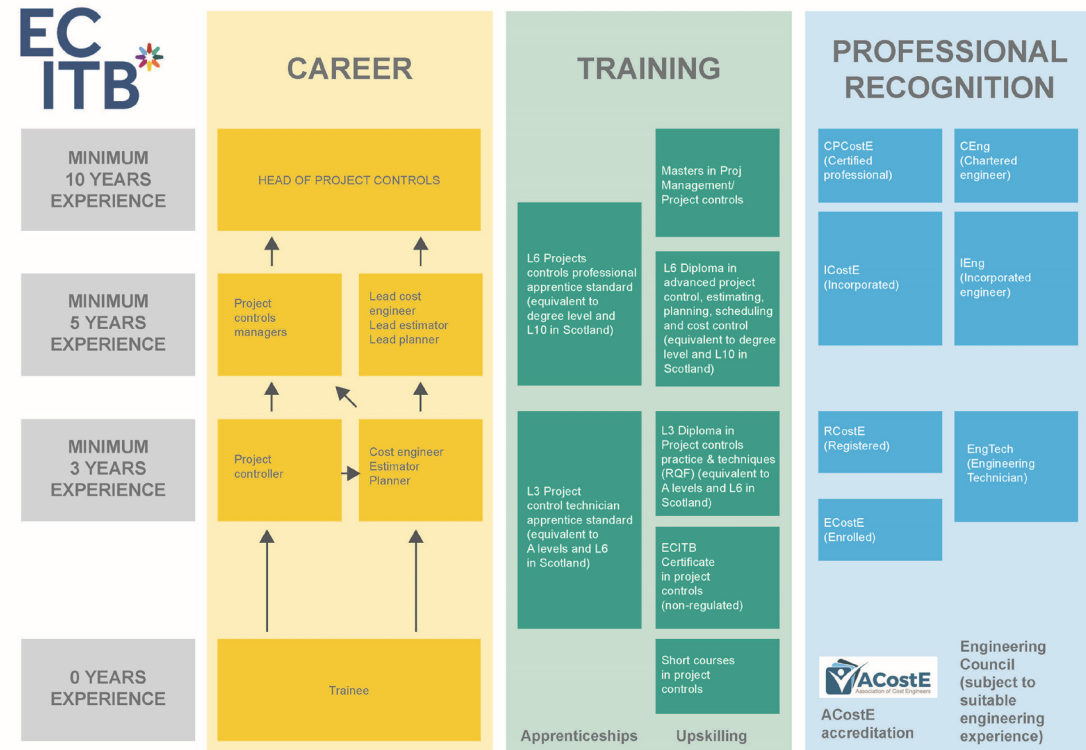

Are you looking to develop in-house capability to ensure you have the skills and knowledge to effectively estimate, plan, schedule and control your projects? The ECITB, has supported companies to put in place the following framework which helps achieve this.

Ideal for upskilling your existing team, growing in-house talent and building capability from trainee to senior management. Integrating this framework, ECITB training, qualifications and apprenticeship standards into your in-house staff development provides a framework to nurture talent and a pathway for future growth – supporting you to attract and retain project control expertise.

This includes the relevant technical expertise, alongside the vital requirement for our future project controls leaders to have an understanding of the wider context in which they operate, have excellent communication skills and the ability to apply their skills to governance, continuous improvement, data analytics and the drive towards carbon reduction and environmental sustainability.

Want to know more?

Visit www.ecitb.org.uk/projectcontrol

Career progression, training, upskilling and professional recognition

Develop competence, endorse credentials and enhance employability prospects.

If you are interested in putting in place the apprenticeship standards or a framework for project control training in your company, come and visit us at Stand 44 to discuss what is available and to find out about ECITB’s approved training providers and assessors.

ECITB: proud supporters of Project Control/Management Apprentice of the Year
