Platinum Partner – Foresight

Foresight's construction project management platform helps owners and contractors deliver major projects on-time and on-budget by automatically identifying priorities, risks, and action plans in Primavera P6 or Microsoft Project schedules. We place the schedule at the heart of project execution, enabling project managers, controllers and schedulers to make data-driven decisions. Leveraging AI, machine learning and natural language processing, Foresight unleashes predictive insights about delay risks and work prioritization. Our secure, scalable and user-friendly platform revolutionizes your planning and execution by creating proactive 'look-ahead' action plans, igniting dynamic collaboration, staying head of risks, learning from past projects, and enhancing schedule visibility/reporting.

"I have a BS in Civil Engineering but I realized having a project management background is just as important to advance my career. The Master of Engineering in Project Management program was the perfect match since it provided project management skills while keeping my technical background in mind. My degree has opened up many opportunities for me."

Maryam Dadabhoy
Master of Engineering Graduate, May 2017
Senior Engineering Manager,
